Disaster Recovery as a Service

Over the past two years, business data loss has increased more than 400 percent due to both natural and man-made disasters. It is critical that organizations of all sizes anticipate such risks, yet many do not take action to ensure their company is safe from unforeseeable events. By not taking the appropriate precautions, businesses greatly jeopardize their ability to recover.

An increasing number of forward-thinking businesses are turning to Disaster Recovery as a Service (DRaaS) to better manage a disaster if it arises. Trace3’s managed DRaaS is a scalable and flexible cloud solution delivered globally, allowing you to design and implement a secure and compliant cloud backup and replication solution that keeps your data protected in all places.

BUSINESS RESILIENCE MADE SIMPLE
Using iLand Secure DRaaS with Veeam, Trace3 can integrate your on-premises Veeam environment with an extension to iLand’s Secure Cloud infrastructure, providing secure and powerfully built replication and failover capabilities.

DISASTER MANAGEMENT IS OUR GOAL
Meeting your resiliency goals is our top priority from design to implementation. With iLand’s global cloud platform you will receive the automation and orchestration necessary to protect your critical business workloads, giving you peace of mind every step of the way.

CONTROL & VISIBILITY
- Automated failover/failback
- Test anytime
- Integrated security
- Automated testing

CONTROL & VISIBILITY
- 100% VMware compatibility
- Integrated security platform and threat mitigation
- Right-sized, usage-based pricing model for cost savings
- Colocation options for legacy system support

INTUITIVE CLOUD MANAGEMENT
View detailed performance information, trigger tests and failovers, with our iLand Secure Cloud console. You can also easily manage all your virtual data center resources, access granular billing information, replicate data, and more – all within one intuitive system.

TAKE THE NEXT STEPS
Cost-effectively meet your security and compliance needs with Disaster Recovery as a Service from Trace3. Contact us at 877.264.2363 or gems@trace3.com to learn more.
