

# Identity and Access Management

Organizations depend on IT to secure its data and protect the enterprise. As workforces grow and users become increasingly mobile, connecting to resources from multiple devices presents unique challenges. Because of this, the ability for IT to provide fast, seamless, and secure access to the appropriate resources is critical.

The need for a robust identity and access management (IAM) strategy is an integral part of enterprise IT. IAM governs and controls user access to data on the platforms that comprise your IT infrastructure. Trace3 offers innovative, next-generation IAM solutions to enable your advanced digital business with solutions that can lower your operating costs while improving security and performance.

## Trace3 IAM Solutions

### CLOUD IDENTITY SERVICES

Our experts have a deep understanding of on-premises and cloud-based identity services and are enabled to skillfully guide you to implement the architecture that is right for your specific business requirements.

### CLOUD IDENTITY GOVERNANCE

Armed with extensive IAM knowledge our team develops robust solutions to ensure your governance, risk, and compliance concerns are addressed to optimize your compliance posture.

### PRIVILEGED ACCESS MANAGEMENT

Aligned with industry-leading best practices our security team designs solutions that protect against data breaches, undetected cyberattacks, and an inability to control the use of privileged accounts.

### SINGLE SIGN ON (SSO)

With industry leading multi-factor authentication (MFA) and SSO tools our experts will guide you to enable your users to access systems, services, data, and information inside the enterprise seamlessly and securely.

### USER AND ENTITY BEHAVIOR ANALYTICS

Empower and protect your business with the ability to identify, track, and reduce insider threats as well as detect potential threats originating from servers, applications, or dormant malware.

### USER LIFECYCLE MANAGEMENT

Enable automation to provision and deprovision users efficiently as our experts guide you through the coordination needed between application teams, data custodians, and compliance stakeholders.

We have a plan to help your organization design and implement Identity and Access Management solutions to grow faster, minimize costs, and operate your business efficiently and securely.
